

IDENTITY · COSMOGRAPH.SPACE · V2

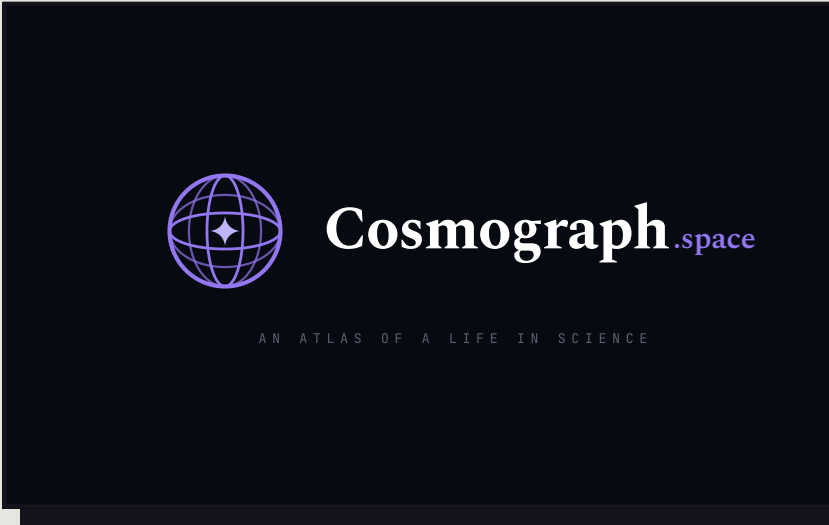

cosmograph

Celestial globe – a lat/long graticule sphere mapping the heavens – with an AI star at its core. The graticule says "celestial cartography"; the sparkle says it's generated. The meridians converge on the star.

LEAD MARK · GLOBE + AI STAR

PRIMARY LOCKUP

CORE TREATMENTS

Clean

Star sits in cleared space, meridians converge as arrows. Crispest.

Glow – lead

Soft purple halo behind the star – gives it a luminous, generated feel.

Twin spark

Main star + small companion – the most overtly "AI". Slightly busier.

FAVICON SCALE & LIGHT VARIANT
